

MELDRID ORTIZ

DATA SPECIALIST

PROFILE

Detail-oriented and data-driven professional with a background in healthcare operations and data management. Experienced in tracking, recording, and analyzing operational data within a high-compliance environment. Skilled in maintaining data accuracy, generating reports, and improving workflows. Seeking to transition into a Data Analyst role where analytical and problem-solving skills can drive business insights.

WORK EXPERIENCE

University of Cebu Medical Center

2022 - PRESENT

CSSD Technician

- Maintained accurate records of sterilization cycles, equipment usage, and inventory logs
- Monitored and documented critical data (temperature, pressure, cycle time) ensuring compliance with healthcare standards
- Performed data validation and quality checks to ensure accuracy of sterilization processes
- Analyzed workflow processes and contributed to efficiency improvements in instrument handling and distribution
- Managed inventory data, tracked supply usage, and identified restocking needs based on trends
- Collaborated with healthcare teams to ensure timely and accurate data reporting

Zitro Cyber Cafe

2010-2020

Entrepreneur / Computer Café Owner

- Managed daily business operations including sales tracking, inventory management, and customer data monitoring
- Collected and analyzed sales and usage data to identify peak hours, customer trends, and service demand
- Developed simple data tracking systems (Excel/Google Sheets) to monitor revenue, expenses, and performance metrics
- Created reports to support data-driven decisions on pricing, promotions, and resource allocation
- Optimized operations by analyzing trends, resulting in improved efficiency and profitability
- Performed basic troubleshooting and system maintenance for multiple computer units

Poppe Stamps, Inc

2007-2011

Stamp Manager

- Promoted from Encoding Specialist to managerial role in a startup company
- Managed and maintained large datasets, ensuring data integrity, consistency, and accuracy across operations
- Performed data cleaning, validation, and transformation to prepare datasets for reporting and analysis
- Developed and monitored Key Performance Indicators (KPIs) to track operational performance and productivity
- Created dashboard reports (Excel/Power BI) to visualize trends, performance metrics, and business insights
- Utilized MySQL to extract, filter, and analyze data for reporting and decision-making
- Generated regular reports to support management in data-driven decision-making
- Identified data inconsistencies and implemented improvements to enhance data quality and workflow efficiency
- Trained and supervised staff on data entry standards, reporting processes, and system usage

Conchology, Inc

2006-2007

Data specialist

- Entered and managed large datasets with a strong focus on data accuracy and consistency
- Performed data cleaning and validation, identifying and correcting errors and duplicates
- Organized and structured raw data for reporting and analysis
- Used spreadsheets (Excel/Google Sheets) to track, filter, and summarize data
- Assisted in generating basic reports and summaries for operational use
